

Press Release

Gothenburg, 2021-03-02

Carmenta is proud to announce a new partnership with Société pour l'Informatique Industrielle (SII)

The partners will join forces with the aim of consolidating GIS (Geographic Information System) expertise and further strengthening customer support in France.

Carmenta Geospatial Technologies will provide its state-of-the-art situational awareness toolkits and expertise, while SII will provide its manpower and engineering skills. A collaboration framework and a core team have been established, to ensure a high level of customer support.

"SII, as a major player in aeronautics, defense and space industries, is very pleased with this partnership, which is part of our strategy of strengthening our global offer by always bringing more innovation to our customers", says Thibaud Clément, Director of Aerospace and Defense at SII Île de France.

"This partnership is very important for Carmenta Geospatial Technologies. It will help keep us close to our key system integrator customers, so we can better support them in the development of defence and security applications" says Torbjörn Lönnqvist, President and CEO at Carmenta Geospatial Technologies.

About SII:

Created in 1979, the SII Group aims to support companies in the integration of new technologies and innovation management methods, to develop their information systems and contribute to the development of their future products or services.

Thanks to our decentralised organisation based on empowerment and the ability to undertake business, the SII Group has deployed on more than 80 sites spread over 4 continents. By relying on our teams of nearly 10,000 engineers worldwide, we offer skills in both Digital Service and Engineering to drive the transformation of many sectors of the economy.

In this market dominated by changing uses, SII is a benchmark player to support these digital developments. Our constant growth shows our commitment to the satisfaction of all our customers, with a sustainable approach. For more information please visit sii-group.com

About Carmenta Geospatial Technologies

With 35+ years of mission-critical experience and a strong global customer base, we make it possible to rapidly create and deploy state-of-the-art 2D/3D geospatial applications, with powerful developer tools and support systems. The Carmenta Software Development Kits provide a range of components that enable you to visualise, analyse and manage real-time data. Combined with various digital maps and all your geo-referenced information, a reliable and efficient operational picture will be established. For more information please visit carmenta.com
