

# Carmenta Server Core 2019.1 Extensions

## 3D EXTENSION

- Enables interactive 3D maps with dynamic loading of data.
- On the fly generation of 3D worlds straight from 2D / 3D GIS data in any format supported by Carmenta Server (such as OGC WMS/WMTS), together with a Cesium quantized mesh terrain service - no 3D modelling is needed.
- Additional support for detailed city models etc. with Cesium 3D Tiles services.

## VECTOR TILES EXTENSION

- Allows fast vector maps by supporting tiled and cached vector data on the Mapbox Vector Tiles (MVT) format, either encoded as highly compressed Google Protocol Buffers (Protobuf) or plain GeoJSON.

## TACTICAL EXTENSION

- Extension for creating, managing and visualising tactical symbols according to the DOD MIL STD-2525 and NATO App-6 standards.

## MILITARY GEODATA FORMATS EXTENSION

- Adds functionality for reading military geographic data in CMRG (PCMap), DFAD and RPF (CADRG and CIB) formats.

## NAUTICAL CHARTS EXTENSION

- Extension for reading and rendering Nautical Charts according to the IHO S-57, S-63 and S-52 standards.

## C-MAP NAUTICAL CHARTS EXTENSION

- Adds support for reading C-MAP CM93 nautical charts and visualising them according to the IHO S-52 standard.

## AERONAUTICAL CHARTS EXTENSION

- Reads aeronautical navigation database files on the ARINC SPECIFICATION 424- 16, 424-17 and 424-18 formats.

## VISIBILITY ANALYSIS EXTENSION

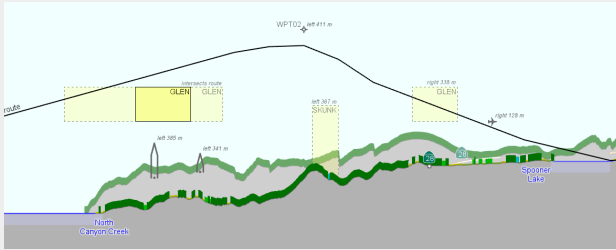

- Extension for performing visibility calculations such as line of sight.

<sup>1</sup> S-63 encrypted Nautical Charts require explicit permission from the data provider if published as map services on a web map server.

### VERTICAL PROFILE EXTENSION

- Generates a vertical profile along routes, cutting through both terrain and vector data sources such as airspaces.

### VERTICAL CLEARANCE EXTENSION

- Calculates the terrain and obstacle clearance in a corridor around routes.

### HEATMAP EXTENSION

- Adds functionality for dynamically generating point density rasters which can be visualised as heatmaps.

### SPATIAL DATABASES EXTENSION

Extension for reading geospatial data from different types of databases:

- Microsoft SQL Server Extension
- MySQL Extension
- Oracle Spatial Extension
- PostgreSQL/PostGIS Extension

### TERRAIN VEHICLE ANALYSIS EXTENSION

- Makes it possible to calculate optimal off-road routes for terrain vehicles based on ground conditions and vehicle characteristics.
- Can also calculate terrain vehicle accessibility and deployability.

### CAD DRAWINGS EXTENSION

- Extension for reading AutoCAD CAD databases in DWG and DXF file formats.
