

What's New in Carmenta Server 4.9 and Carmenta Server Core 2024.0

DGIWG Profile Support - WMTS & WMS

Configure your WMTS and WMS services to conform with the DGIWG profiles. Offering such services ensures even better interoperability with DGIWG compliant systems.

Updated INSPIRE WFS Schemas

Schemas for WFS INSPIRE Transport Network model for Railway, Road and Water output have been updated to the latest version. Output for INSPIRE services is now formatted according to version 4.0 of the INSPIRE WFS schemas.

Miscellaneous Improvements

The following additional improvements have been made.

Carmenta Engine 5.16

Updated Carmenta Engine runtime to the latest version.

Custom Propagation in the Visibility Analysis

A new kind of custom object, the *Custom Propagation*, makes it possible to replace the propagation model in the high-performance visibility analysis.

.NET 8.0

Updated .NET to the most recent version, .NET 8.0. This version of .NET is an LTS (Long Term Support) release with an extended support period.
